Pussy to the Wind

Two months actually, there was a lot of damage.
That’s such a long time! And did you really have to get them to transfer my soul into your... your vagina... I could have just been your hand, or your nose or something, you know.

Hey, I had to think quickly, and I wanted to pick something that I knew I was going to be protective of. I don't want my brother to be my pussy any more than you! Especially because you're making me so sensitive to touch...
Why are you taking your underwear off? Oh shit! Are we outside!? Cover yourself, you slut!

I can’t help it, even the touch of my panties on me, on YOU, is driving me crazy! You think being your sister’s cunt for two months is bad, imagine having to go two months without rubbing one out! While at the same time being more sensitive than you’ve ever been!
Geezus, are you always this... open?! You’re outside and you’re naked! It’s the middle of the day! Put me away, this is humiliating.

Oh relax, no one knows you're down there. Damn that breeze feels good, it's going to be hard not to touch myself... My pussy is on fire, and the fact that I shouldn't touch is making me want it so much more!
Well you better contain it, Being attached to you is already fuckin weird, having you do that to me would be... Well our relationship would never be the same after that...

Fine, I won't. But you can't stop me from being naked! Ever since I moved out of mom and dad's house, I spend more time naked than with clothes on, it's so liberating!
God, why did I have to get stuck with the nudist sister? And why wasn't anyone else there to get me after my accident?

Well look at the bright side. I WAS there to save you and now we get to spend more time together!
No offense, But I would rather not see you for a while than have THIS be the way we spend time together...
